MESSAGE

I Favor the FDA promptly IN 1 MONTH approving the claims filed for:

Dear Dr Henney as Representative of the FDA

3) Folic acid
4) Vit B6 +
5) B12
6) Vit E

USA has the technology to go to the Moon & Mars, yet
we have to beg you, the FDA, to approve claims that
long ago have been proven over & over again. The FDA has
been an embarrassment - going after doctors & burning books
& taking away medicines from cancer victims! My relatives
in Europe laugh at us Americans & the FDA - they say it sounds
like Hitler's book burnings & persecutions!

People are suffering and dying everyday from your incompetence
Please hurry and approve these claims in this month - the
proof is out there in abundance!

It's a real shame that USA can let the food, water,
soil & air become so poisoned, that we now have the
beginnings of a cancer epidemic yet we have to beg the
FDA for a bit of common well known information for our
less informed fellow Americans! Look at Japan & Germany way ahead of us

The fast increase in cancer rates shows the cancer
epidemic coming & the increase in death rates shows that chemo
therapies knock out the immune system creating more cancer
in the future! People need to hear from the FDA that vitamins
herbs and other things can help their immune systems! Thank You
